From the ENC(R&B) Roads, Hyd., Lr No:

ORDER:

In the letter read above, the Engineer-in-Chief (R&B) Admn.& Roads, Hyd., has stated that Mulikipalli- Gogannamatam road is an important MDR in E.G District having a total length of 7.4 Kms. This is a single lane BT road. This road connects a number of villages like Mulikipalli, Ponnamanda & Gogannamatam apart from connecting important roads i.e., Sivakodu-Manepalli(at Mulikipalli junction) and Mamiidikuduru-Gogannamatam road (at Gogannamatam Junction), which subsequently lead to NH216.

2. He has also stated that a bridge is being constructed at Bodasakurru and after the construction of bridge the traffic will enormously increase on this road as the distance to Revenue Head Quarters, Amalapuram will be decreased by Construction of bridge. Due to increased traffic intensity the present width of the road will become inadequate. Hence it is proposed to widen the road in selected reaches based on availability of land. Further the road is damaged at many places, forming pot holes and sunken portions. Hence it is proposed to strengthen the road. Further he has proposed to construct retaining walls to arrest slippage of slopes as the road is running on canal bund.

3. Further in the village limits the road is getting damaged frequently due to stagnation of water. Hence CC pavement is proposed in village limits and prevent recurring damages to the road. Accordingly a detailed estimate has been prepared by ENC, for improvement of the above road, which includes widening at selected reaches, strengthening, providing CC pavement in village limits, and construction of retaining wall where slopes are vulnerable. The subject proposal do not require any Stage-I approval, as contemplated in G.O.Ms.No.94, I&CAD Deptt, dt:01.07.2003.
